

The chart displays a highly regular, periodic pattern of requests over time. The x-axis represents time from 2025-03-13 to 2025-04-09, with major ticks every four days. The y-axis represents the number of requests per second, ranging from 0 to 100. The data shows a consistent cycle of sharp peaks reaching approximately 100 requests per second, followed by a rapid decline to near-zero values. This pattern repeats approximately every 24 hours, suggesting a daily recurring event or scheduled task.
